# INTRODUCTION

TTS is a memecoin with a profound purpose - it's a rallying cry for those who refuse to accept the world as it is.

TTS challenges the status quo, taking a stand against corruption, unchecked privilege, and scams in the crypto space. The project embodies the fight within each of us against war, oppression, greed, and manipulation. It's a **vision for a better future: one where our children are safe, the vulnerable are protected, and our voices truly matter.**

Our promise to transparency and active community engagement isn't just talk- it's what makes us different, and it's what keeps us united. This is your FIGHT, your future. Together, we're unstoppable.

# THE TTS TOKEN

## Project Background

The TTS Token was launched in July 2024, just days after an assassination attempt on the former United States president Donald Trump.

In a powerful moment, Trump rose immediately after being shot, raised his fist, and shouted “FIGHT!” - a gesture of defiance that captured the global struggle against the dark forces of unchecked power. This moment symbolised both the depths of the world’s systemic issues and the fight against them.

While this project has no affiliation with Trump or any political party, the TTS logo honours this symbolic act by featuring a raised fist.

It also makes reference to rising up and breaking through.

“The True Signal” embodies a rallying cry for resistance, courage, and resilience in the face of the forces we’re fighting against.

# THE TTS TOKEN

## Token Utility

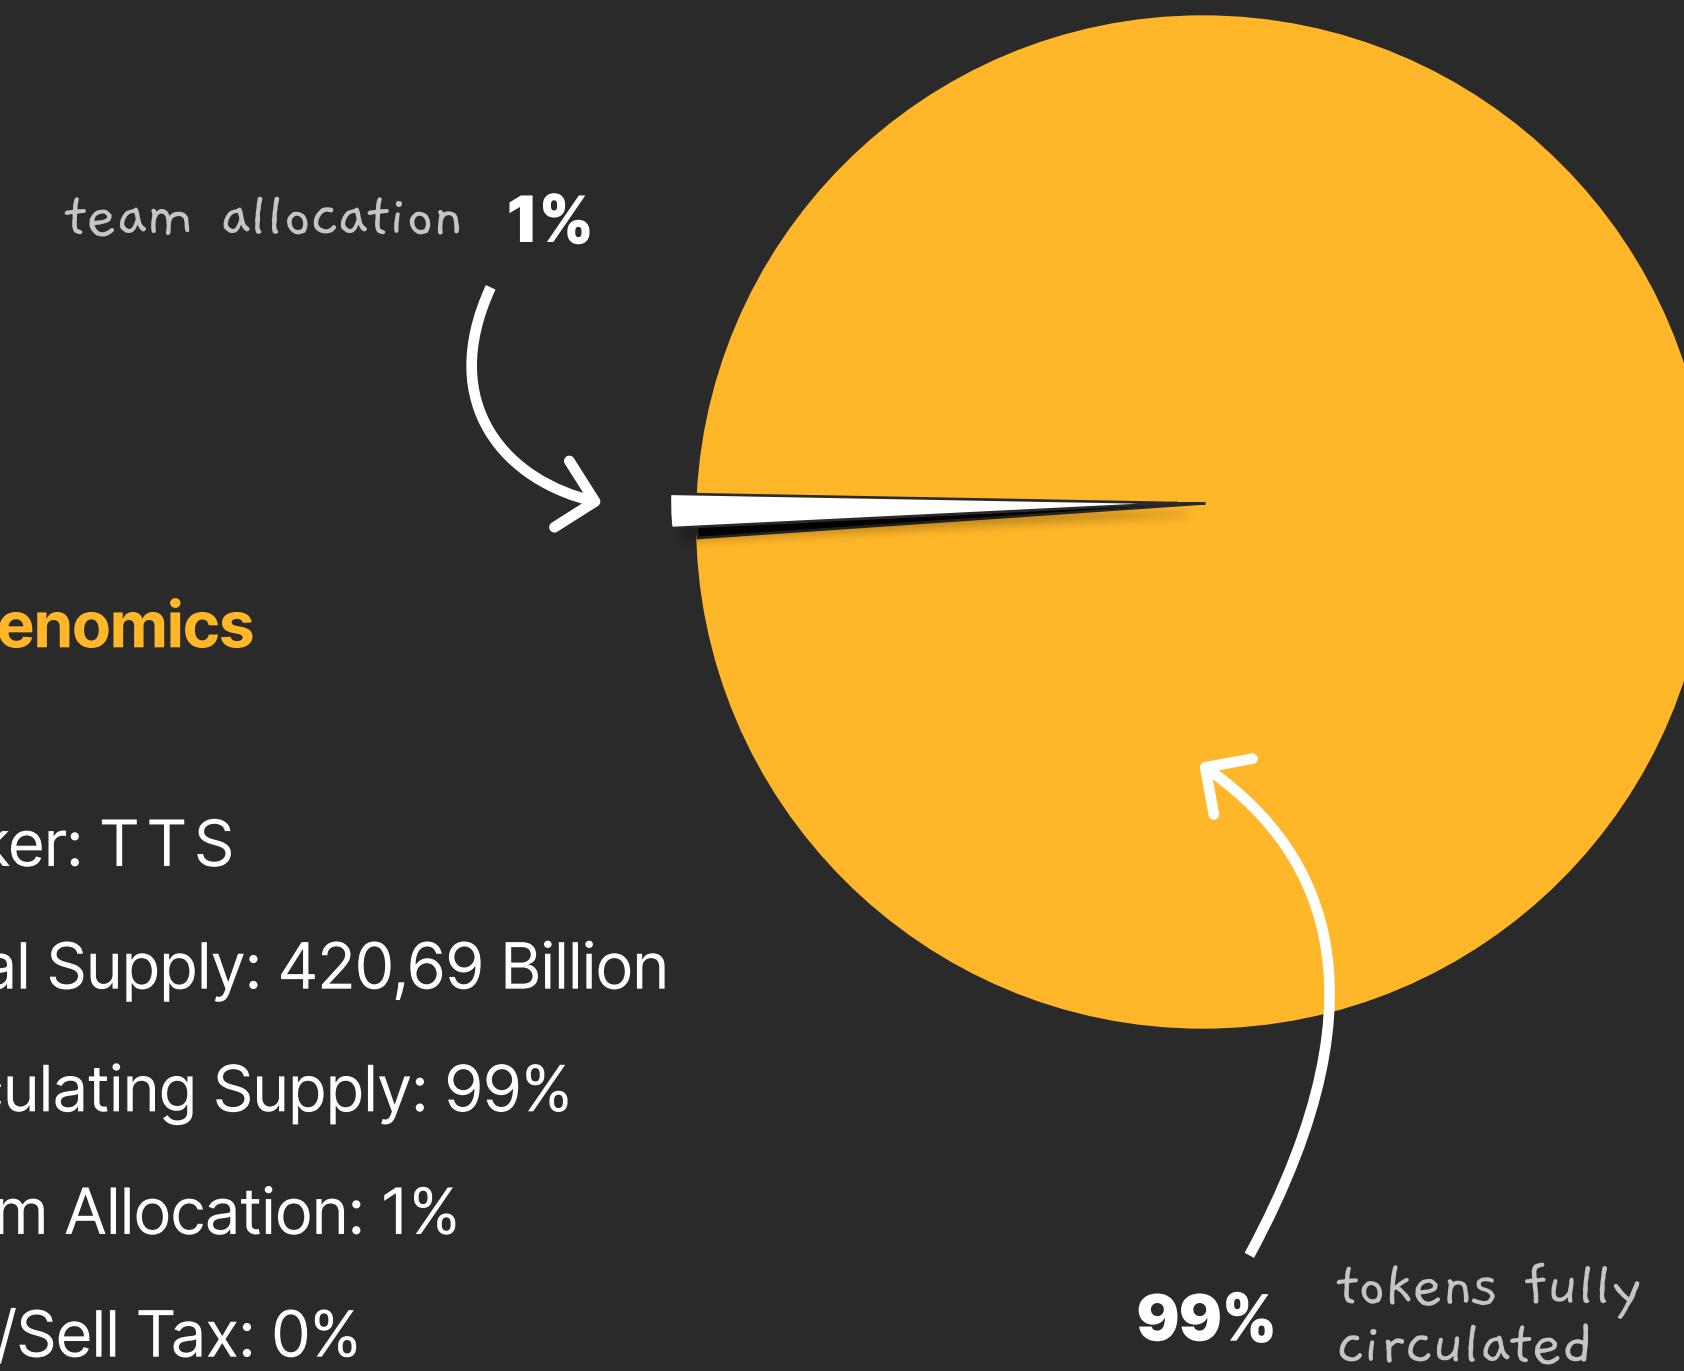

While TTS is primarily a memecoin, its strong community and transparent nature provide several utilities:

**Community-Driven Governance:** The TTS community will have a significant say in the future direction of the project.

**Transparency and Trust:** We prioritize transparency in all aspects of our operations, ensuring trust between the project and its community.

**Potential for Growth:** As a memecoin with a strong narrative, TTS has the potential to attract a large and dedicated following, driving its value and utility.

New features for token holders will be communicated via our Telegram channel and official website.

## Tokenomics

Ticker: TTS

Total Supply: 420,69 Billion

Circulating Supply: 99%

Team Allocation: 1%

Buy/Sell Tax: 0%

TTS is built on the Base Blockchain. Available to buy via UniSwap.

# THE FIGHT NFT

The TTS NFT Collection, known as "The Fight," visually captures the spirit of the movement launched by the TTS token. Each NFT is a unique piece of digital art that embodies the core values of the project: transparency, community, and the fight against corruption, injustice, and darkness.

## Aesthetic Style

Each NFT in the collection is meticulously hand-drawn, combining a bold, neo-pop art style with vibrant colours and a comic-book aesthetic that brings the pieces to life. The design features eye-catching sharp contrasts and striking colour palettes, adding visual intensity and modern appeal.

At the centre of each NFT is the character—a raised fist—that serves as a powerful nod to the TTS logo and symbolises resistance, resilience, and defiance. This character is surrounded by multiple symbolic elements, from illustrations and background text to items worn by the figure, each representing core values of the TTS movement.

Distinctive traits within each NFT represent different facets of the fight against corruption and injustice, forming a cohesive, impactful piece. How each NFT is displayed—whether as a profile picture, meme, or graphic—adds unique meaning, amplifying its resonance for both the holder and the audience.

By collecting and sharing these NFTs, holders join the movement and help boost the collection's visibility, sparking the potential for a viral trend.

## NFT Tokenomics

Total Supply: 5000 NFTs

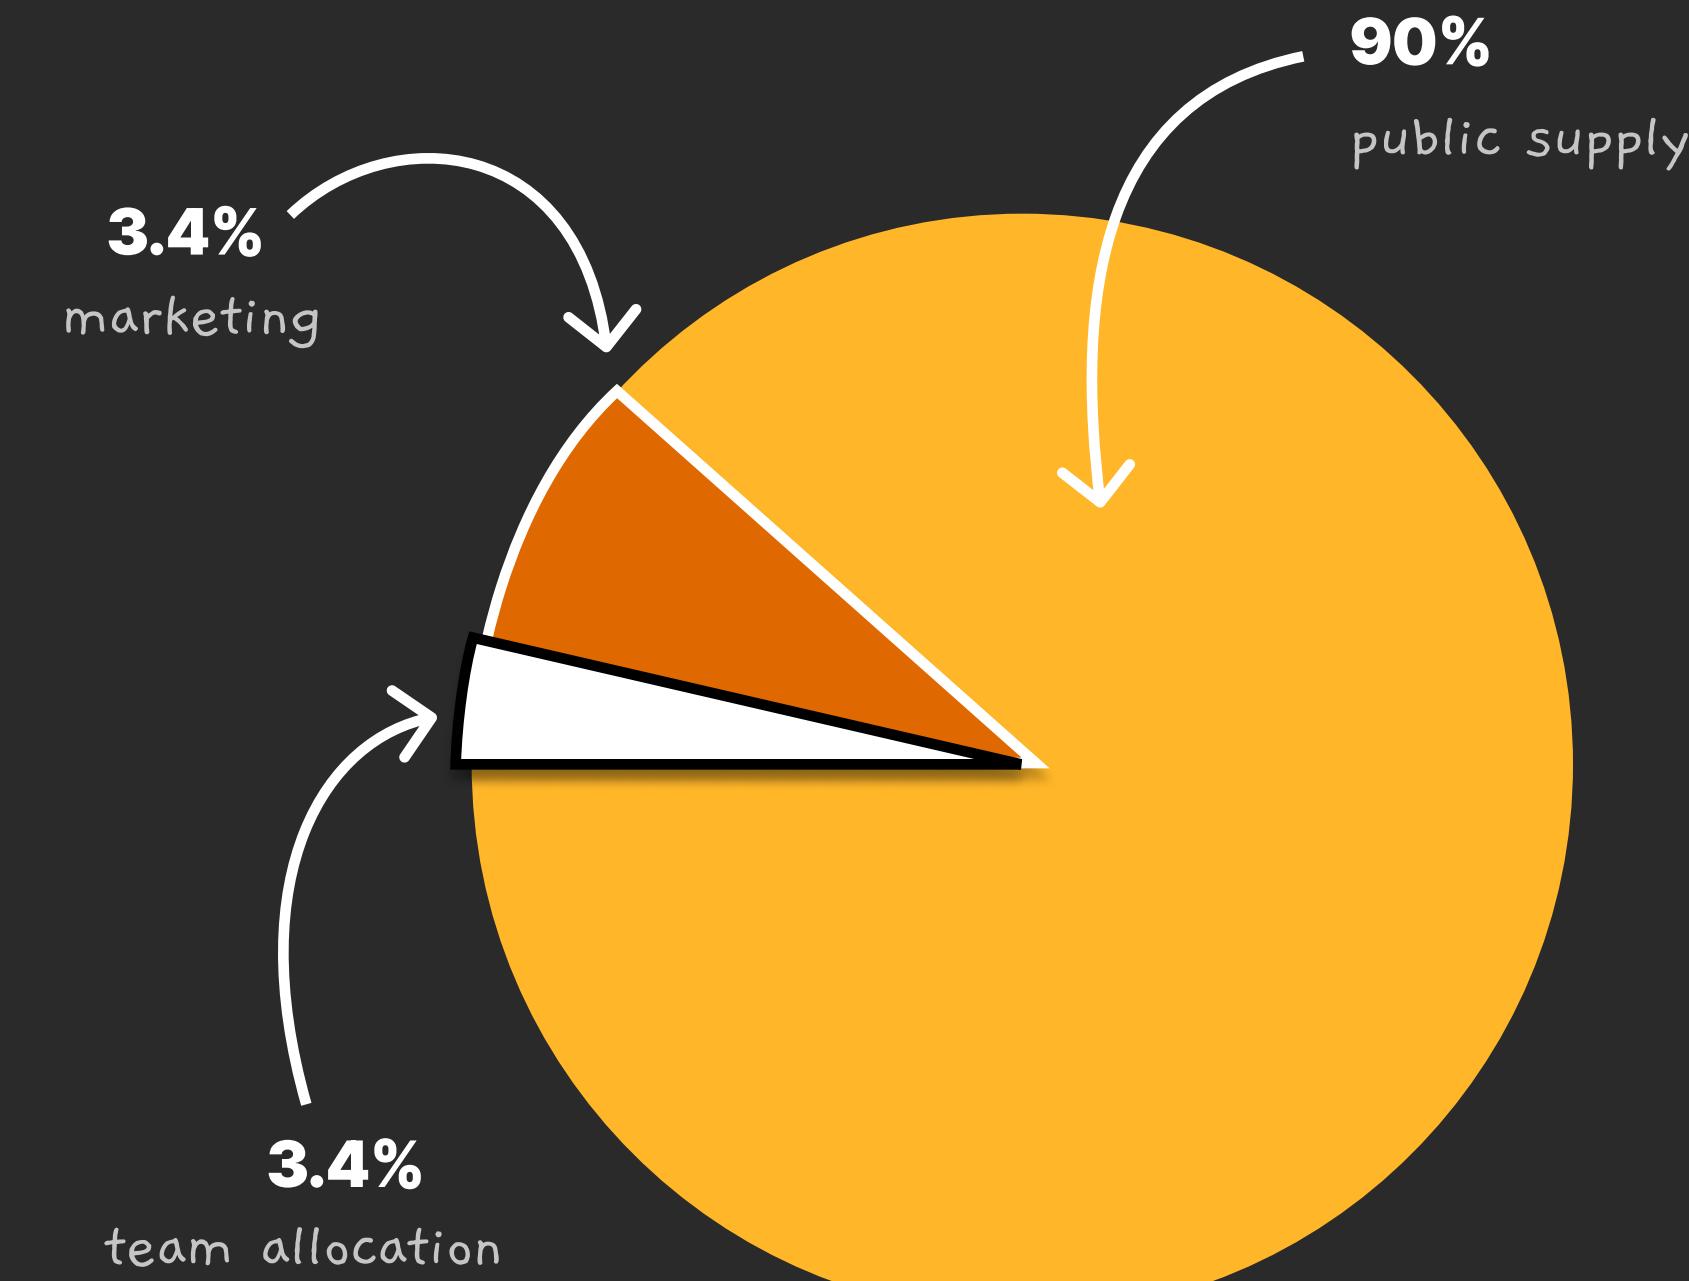

Public Mint Supply: 4500 NFTs

Marketing Wallet Allocation: 330 NFTs

Team Allocation: 170 NFTs

Blockchain:

– BASE

## NFT Utility and Royalty Distribution

Each NFT holder will have the opportunity to participate in the TTS community and contribute to the project's future.

Additionally, a 5% royalty fee will be collected on secondary market sales. These royalties will be distributed as follows:

50%: Allocated to a fund for buyback mechanisms, liquidity additions, and staking rewards.

50%: Allocated to the marketing portfolio to continue promoting the project and expanding its community.

## Post-launch

Shortly after the minting event, NFT's will be available to purchase from the leading p2p marketplace **OpenSea**

## Unique Trait Combinations

The TTS NFT Collection is designed to avoid redundancy. With wide range of common and rare traits we are able to combine them in innovative ways to create visually appealing and distinctive NFTs. This ensures that each NFT has its own unique identity and appeal.

## The Chance for Rarity

Any NFT minted during the public sale, has the potential to contain rare, epic, or even legendary traits.

This adds an element of excitement and anticipation to the minting process.

It's important to note that whitelisted NFTs, such as those allocated to the marketing wallet, will be restricted to common or rare traits. This ensures that everyone who participates in the public sale has an equal chance to mint an NFT with a rarer trait.

# TOKEN + NFT RELATIONSHIP

## The Symbiotic Relationship Between TTS + FIGHT NFT

The TTS token and the NFT collection are deeply intertwined, forming a symbiotic relationship that drives the growth and sustainability of the entire ecosystem.

### TTS Token: The Foundation

The TTS token serves as the foundation of the entire ecosystem. It is the currency that powers the community, facilitating transactions and enabling participation in various activities. By holding TTS, users become active members of the community and have a direct impact on the project's future.

The fair launch of the TTS token, without a marketing wallet or taxes, presents a healthy and desirable proposition for investors. However, the same attributes were presenting a challenge for the team in terms of sustainable growth and funding. This is where the NFT collection comes into play.

THE CATALYST

### THE FIGHT NFT COLLECTION

Funds Marketing   Reaches a Wider Audience  
Increases Awareness of the Movement  
Drives Engagement + Partnerships

THE FOUNDATION

### TTS TOKEN

Powers Community   Facilitates Transactions  
Demonstrates active participation

## NFT Collection: The Catalyst

The NFT collection acts as a catalyst for the growth and sustainability of the TTS ecosystem. By generating revenue through pre-sales and secondary market royalties, the collection provides a steady stream of income. This income can be utilized to:

### Fund Marketing and Community Building Efforts:

Allocating resources to promote the project, attract new users, and foster a vibrant community.

### Implement Buyback Mechanisms:

Actively purchasing TTS tokens from the market, reducing supply and increasing demand.

### Add Liquidity to Trading Pairs:

Enhancing market liquidity and stabilizing the token's price.

## Develop New Features and Enhancements:

Investing in the development of innovative features and improvements to the ecosystem.

The FIGHT NFT Collection is just the beginning. A powerful spark igniting the future of TTS. We're not stopping here; our roadmap is packed with ambitious plans and groundbreaking initiatives. This isn't just a project; it's a movement built for the long haul, with exciting milestones still to come.

## A Mutually Beneficial Relationship

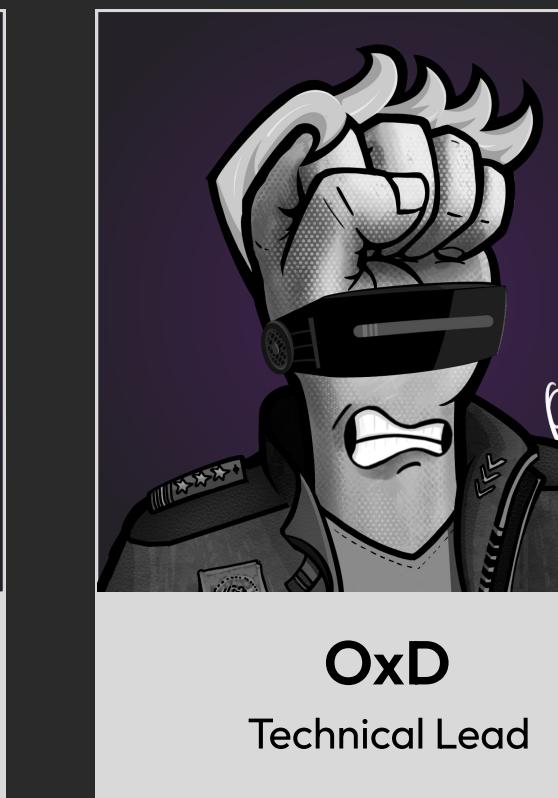

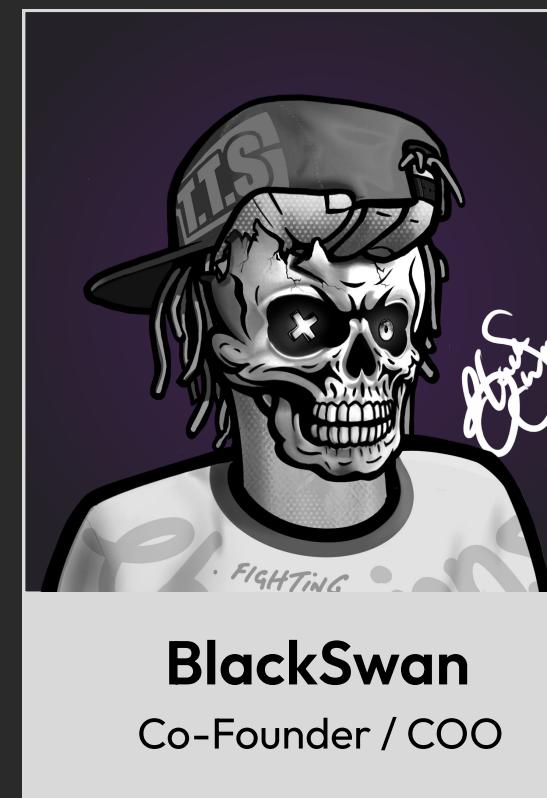

The success of the NFT collection directly contributes to the growth and stability of the TTS token. Conversely, the strength and popularity of the TTS token enhance the value and desirability of the NFT collection.

By working together, the TTS token and the NFT collection create a powerful synergy that drives the long-term success of the project.

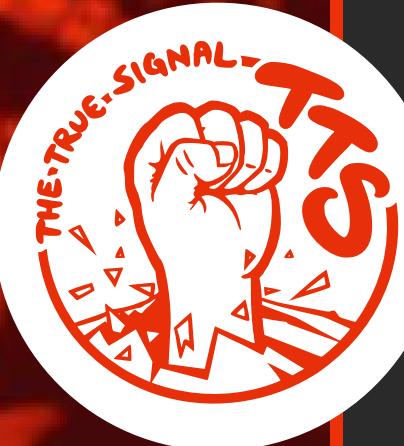

# THE TEAM

Trusted and dedicated members themselves, MrGreen & BlackSwan come from the 350k strong Blockchain Whispers community. Both with several years of high-rank within the community we chosen by D Man, the BCW Founder to lead the FIGHT!

The overall TTS team consists of 14 members covering Operations, Social Media, Marketing, and Community Development.
